About Bangalore

Bangalore, officially Bengaluru, is the capital of the Indian state of Karnataka. It has a population of over ten million, making it a megacity and the third-most populous city and fifth-most populous urban agglomeration in India. It is located in southern India

Modern Bangalore was begun in 1537 by a vassal of the Vijayanagara Empire, Kempe Gowda I, who aligned with the Vijayanagara empire to campaign against Gangaraja (whom he defeated and expelled to Kanchi), and who built a mud-brick fort for the people at the site that would become the central part of modern Bangalore

With an economic growth of 10.3%, Bangalore is the second fastest-growing major metropolis in India,[142] and is also the country's fourth largest fast-moving consumer goods (FMCG) market.[143] Forbes considers Bangalore one of "The Next Decade's Fastest-Growing Cities".[144] The city is the third largest hub for high-net-worth individuals and is home to over 10,000-dollar millionaires and about 60,000 super-rich people who have an investment surplus of ₹45 million (US\$630,900) and ₹5 million (US\$70,100) respectively.[145]

The headquarters of several public sector undertakings such as Bharat Electronics Limited (BEL), Hindustan Aeronautics Limited (HAL), National Aerospace Laboratories (NAL), Bharat Earth Movers Limited (BEML), Central Manufacturing Technology Institute (CMTI) and HMT (formerly Hindustan Machine Tools) are located in Bangalore. In June 1972 the Indian Space Research Organisation (ISRO) was established under the Department of Space and headquartered in the city. Bangalore also houses several research and development centres for many firms such as ABB, Airbus, Bosch, Boeing, General Electric, General Motors, Google, Liebherr-Aerospace, Microsoft, Mercedes-Benz, Nokia, Oracle, Philips, Shell, Toyota and Tyco.

Bangalore is called as the Silicon Valley of India because of the large number of information technology companies located in the city which contributed 33% of India's ₹1,442 billion (US\$20 billion) IT exports in 2006–07.[146] Bangalore's IT industry is divided into three main clusters – Software Technology Parks of India (STPI); International Tech Park, Bangalore

(ITPB); and Electronics City. UB City, the headquarters of the United Breweries Group, is a high-end commercial zone.[147] Infosys and Wipro, India's third and fourth largest software companies are headquartered in Bangalore, as are many of the global SEI-CMM Level 5 Companies.

Overview of Project

Explore, segment, and cluster the neighborhoods in the Bangalore to identify business opportunities

Business Problem

Bangalore, officially Bengaluru is the capital of the Indian state of Karnataka. It has a population of over ten million, making it a megacity and the third-most populous city and fifth-most populous urban agglomeration in India.

Knowing this it has become a dream business location for many of the prospective businessmen, but due to its scope length and breadth of Bangalore it becomes challenge for one to find the type of business and location to choose.

Target Audience

Our solution with help prospective businessmen to decide businesses that they can opt for particular location

By adopting our solution they will ensure that they are in right business and at right place

Data acquisition and cleaning

Data

To arrive on the objective, we will need the following data

- 1) Bangalore Pin codes with places
- 2) Latitude and Longitude data for all the pincodes
- 3) List of Neighborhood of Bangalore with what it is popular for

Data Source and Method of Extract

For this project I have used Bangalore Postal codes data from below link and also used FourSquare API to understand the Neighborhood

Link : For Bangalore neighborhood

Latitude & Longitude: <http://www.geonames.org/export/zip/>

Methodology

- Data will be collected from <http://www.geonames.org/export/zip/> and cleaned and processed into a dataframe.
- FourSquare be used to locate all venues and then filtered by Italian restaurants. Ratings, tips, and likes by users will be counted and added to the dataframe.
- Data will be sorted based on rankings
- Finally, the data be will be visually assessed using graphing from various Python libraries

Results

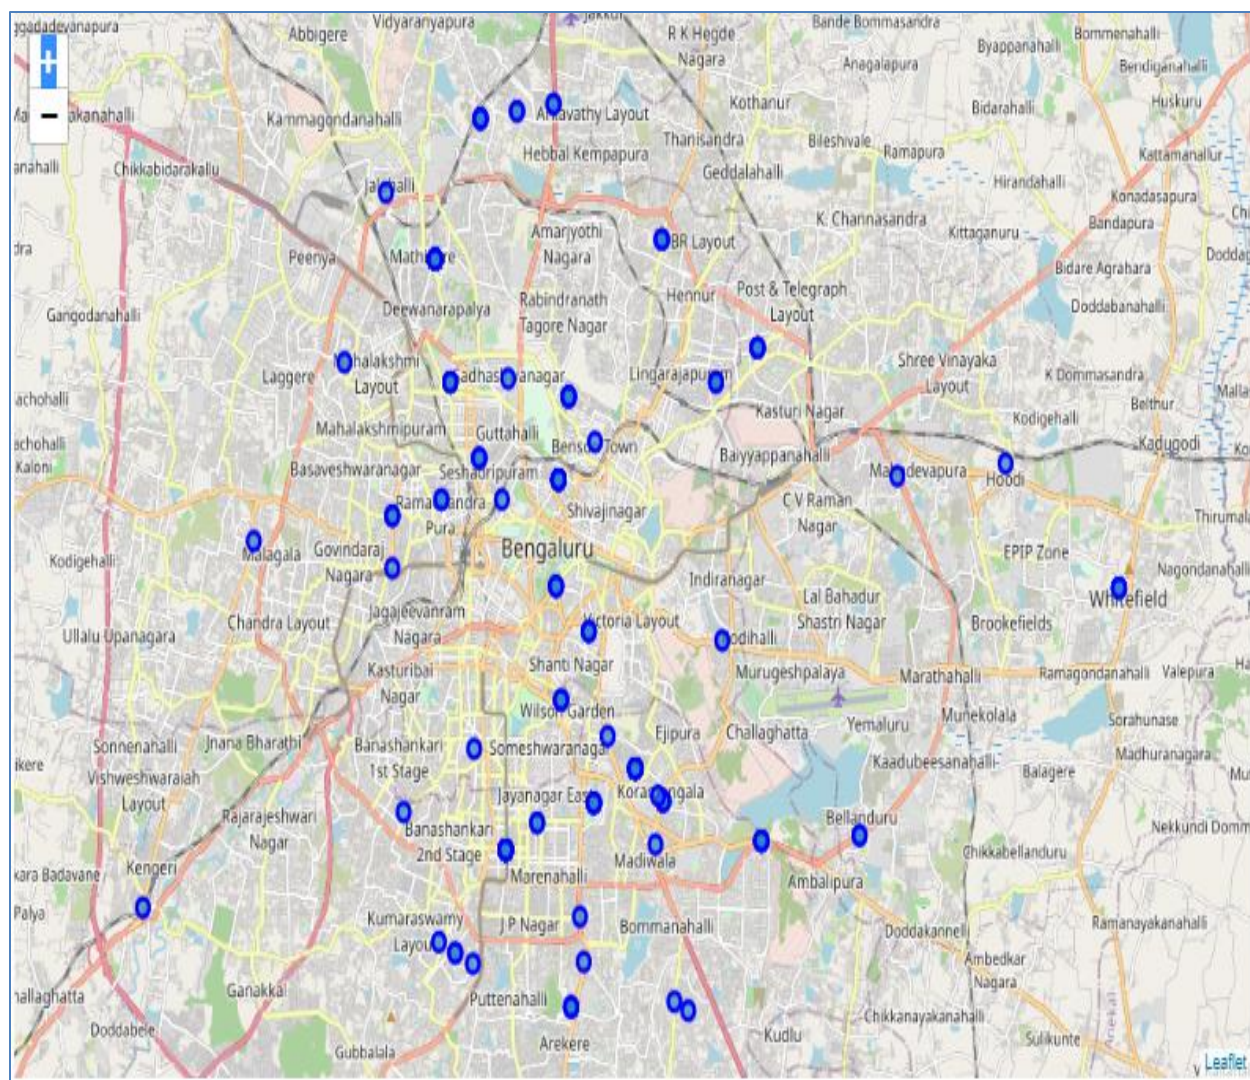

The following are the highlights of the 5 clusters above:

Hotels are clearly located only in Cluster 1 (South West of Barcelona), which makes the choice of the final location very easy, in case Momentum does want to reduce risks.

As for restaurants, bars and coffe shops are very popular also in the South West of Barcelona. Especially in Ciutat Vella, Eixample and Gracia districts.

As for night live is clearly allocated in Cluster 3 under the Les Corts district.

Although, the Clusters have variations, a very visible presence is the predominance of bars and restaurants, which is typically for any Spanish city.

Discussion and Conclusion

It is noticable that Cluster 1 is the most viable clusters to start a business. The proximity to various Neighborhood is an advantage for businessmen. Options are wide open since it filled with Restaurants, coffee shops, Market area, Pubs, Halls...One csan thinkof starting Childrens play area, or another restuarant etc.. simillarly Cluster 3's common spot is Tourism so one can start connect business plan in this cluster. So objective is to see business opportunity and each cluster has unique opportunity to think of.
